PROFESSIONAL SUMMARY

Software engineer with four years experience across frontend and full-stack delivery: React, TypeScript, Next.js, fastAPI, and .NET, in healthcare, e-commerce, and payments. Comfortable owning features end-to-end, improving performance and structure of existing codebases, and working with product and backend teams in agile environments. Currently completing a Master's in Management with Data Analytics alongside founding engineer work at an early-stage product company.

- **Languages:** JavaScript, TypeScript, C#, SCSS/SASS, Python, SQL (T-SQL, PostgreSQL)
 - **Frontend & APIs:** React, Next.js, Vue.js, Redux Toolkit, REST, GraphQL, Bootstrap
 - **Backend:** Node.js, FastAPI, .NET Core
 - **Database:** MSSQL, T-SQL, PostgreSQL
 - **DevOps & quality:** Git, Bitbucket, Docker, Jenkins, Postman
 - **Collaboration:** Jira, Confluence, Trello, ClickUp, Zoho, Slack
-

PROFESSIONAL EXPERIENCE

AdTecher

Founding Engineer

Jan 2026 – May 2026

- Shipped React and TypeScript interfaces for analytics dashboards and chat/briefing flows: reusable components, charts, onboarding, and stateful views.
- Helped shape architecture using domain-driven ideas: clear domain modules and shared core infrastructure so the codebase can grow without turning into a monolith.

Vynspire AI Labs Pvt.

Software Engineer

Aug 2025 – Nov 2025

- Maintained and refactored a Next.js/TypeScript frontend for performance, readability, and scalability.
- Integrated PayPal and Stripe for bookings, payments, and subscriptions, including handling edge cases and production UI/API/payment issues.

Fatdog Technology Pvt.

Frontend Developer

Aug 2024 – March 2025

- Built a healthcare module for dynamic disease-specific forms, making configuration and day-to-day use easier for clinical workflows.
- Delivered a Next.js / TypeScript e-commerce storefront and a Vue.js admin portal; contributed to a Next.js test booking system.

Logica Beans Pvt. Ltd.

Software Engineer

Oct 2021 – July 2024

- Offshore developer for a US healthcare product: business rules and UI in React, TypeScript, and GraphQL.
- Frontend for multi-tenant healthcare portals and an advertising management system; reusable React components to speed delivery and keep UX consistent.
- Loan management: features on .NET Core and React; worked with the team to reprioritise as client requirements changed.

Influence | Target Solutions India

Software Engineer Trainee

Jul 2021– Sep 2021

- Built React UIs from requirements through to implementation.
- Maintained legacy code, peer-reviewed PRs, and improved quality through small, safe refactors.

EDUCATION

BPP University (Master's Degree)

Jan 2026 - Jan 2027 (expected)

Management with Data Analytics

IK Gujral Punjab Technical University (B.Tech)

Jul 2017 - May 2021

Bachelor's in Computer Science Engineering
